WHAT CUSTOMERS HAVE TO SAY

BLANCO INDEPENDENT SCHOOL DISTRICT
Blanco, Texas

"It's comforting to know that we can see what's going on now, and if people ask about our district's security, we can say we have a **top-of-the-line surveillance system.**"

KINGSTON PUBLIC SCHOOL DISTRICT
Kingston, Oklahoma

"I simply can't put a price on [support]. I don't think we could have done a lot of what we did without D-Link's help... Today, the system is running great and I haven't had to even touch it in 18 months. It's **95% maintenance-free** and I don't have to worry about it at all. From a technical director's standpoint, **it's absolutely perfect.**"

PANA SCHOOL DISTRICT
Pana, Illinois

"With the new network, we've increased internet performance by several orders of magnitude. Teachers use calendar, scheduling, lesson plan, collaboration and testing software via the ip infrastructure and connect to the internet to stream educational content directly to their in-class smart boards. **The speed and latency improvements were immediate and overwhelming!**"

LIVINGSTON INDEPENDANT SCHOOL DISTRICT
Livingston, Texas

"I love nothing more than telling people my story. I originally walked into a D-Link network and wanted to cry, and today I'm eating my words. I get to explain how D-Link has changed my environment. I don't get any complaints about the network anymore, and my phone literally never rings. That is proof in the pudding. **D-Link has made my job here incredibly easy.** I'm a true believer now."
